**Moveable wall / retains 3-stall garage**

Many people do not realize how unfinished basements can be damp, non-energy efficient and usually have lower home values. You get to decide if you want a nice revitalization upgrade or a total renovation. It is always important to be code compliant. Call for an appointment for us to see your basement and give you a complementary analysis on 1<sup>st</sup> visit.

Old block basement change to creative floor plan or design

<— Basement entrance with new steps & oak handrail

Bedroom with Window & Closet under steps —>

Egress window outside & sump pump under it

Living Room or Exercise

Dining Room or Card Games

Full Kitchen and Laundry Room

Full Bathroom with Shower

From an old, renovated block basement home like above photos, or newer homes with unfinished basements, we have cost effective creative solutions for your benefit. Most unfinished basements can be damp, non-energy efficient and usually have lower home values. It is always important to be code compliant. Call for an appointment for us to see your basement and give you a complimentary analysis on 1<sup>st</sup> visit
